STANDALONE UNIT

WAVY BOX

Standalone unit for the electromagnetic environment

A simple solution for your everyday environment

The Wavy Box is a standalone unit designed for use in places where numerous electrical and wireless devices operate on a daily basis: Wi-Fi, internet router, telephones, computers, televisions, connected objects, induction hobs and other electrical appliances.

Its role is to act passively on the electromagnetic environment around it, without cutting off the waves and without disrupting the normal operation of your equipment.

No power connection

No battery

No maintenance

Wi-Fi never cut off

USE

What is the Wavy Box for?

Our homes are now fitted with numerous electrical and wireless sources, sometimes operating 24 hours a day.

The Wavy Box is intended for people who wish to act on their electromagnetic environment while continuing to use their Wi-Fi, their telephone and their connected devices as usual.

Once correctly installed and oriented towards the north, the Wavy Box is intended to harmonise the electromagnetic environment within its area of action.

It then works completely autonomously, with no daily intervention.

BENEFITS

Why install a Wavy Box?

The Wavy Box offers a simple solution for equipping a house, a flat or a professional space without changing your habits.

It is designed to:

- act permanently on the electromagnetic environment around its location;
- work without cutting off Wi-Fi or the mobile network;
- work without a power supply or a battery;
- blend discreetly into your interior.
- accompany the various electrical and wireless sources present in the home;
- not disrupt the operation of connected devices;
- require no particular maintenance;

ENVIRONMENT

The everyday equipment concerned

- Wi-Fi
- Internet router
- Telephones
- Computers
- Televisions
- Connected objects
- Induction hobs
- Electrical appliances

HUMIDITÉ CONSEIL SAS - Registered office: 57 Avenue Gambetta - 82000 Montauban - Email: humidite.conseil@gmail.com - www.humidite-conseil.com - RCS number of Montauban: 911 135 853

INSTALLATION

Simple installation – Orientation towards the north essential

1. **No technical work**
   Installing the Wavy Box requires no technical work.

2. **A stable surface**
   Simply place the device in a suitable area of your home, on a stable surface.

3. **Find the north**
   You can easily determine the north using a compass or the compass function of your smartphone.

4. **That's it**
   Once correctly positioned and oriented, no further adjustment is necessary.

Orientation towards the north

Compass or smartphone compass app

Important

The Wavy Box must always be oriented towards the north in accordance with the installation instructions.

No power connection

The Wavy Box works without being connected to the mains.

No battery

You have no cells or batteries to change.

No maintenance

Once correctly installed, it simply stays in place.

LOCATION

Where should the Wavy Box be installed?

It can be used in particular in a house, a flat, an office, a shop, a professional practice or a workspace.

House | Flat | Office | Shop | Professional practice | Workspace

For optimal use, choose a suitable location that allows the orientation towards the north to be correctly respected.

EVERYDAY USE

Designed for everyday use

The Wavy Box is compact, light and discreet. It can remain permanently installed without changing the everyday use of your equipment.

You carry on using your internet router, your Wi-Fi, your telephones, your television and your electrical appliances as usual.

Stylish and lightweight product

16 × 14
DIMENSIONS (CM)

300 g
WEIGHT OF THE DEVICE

Designed in France

The Wavy Box was developed in France in order to offer a standalone solution, simple to install and with no constraints in everyday use.

In summary

Wavy Box is a passive device intended to act on the electromagnetic environment of your home or your professional space.

- No power connection.
- No battery.
- No maintenance.
- No Wi-Fi cut-off.

It simply needs to be installed correctly and oriented towards the north.

IMPORTANT INFORMATION

The Wavy Box is not a medical device and is not intended to diagnose, prevent, treat or cure any disease. It does not replace medical advice or the official recommendations concerning exposure to electromagnetic fields.
