

STANDALONE MAGNETIC CORRECTOR

WAVY PLATE

Standalone magnetic corrector for the electrical panel

A simple solution to install directly on the electrical panel

The Wavy Plate is a standalone device designed to be placed directly on the electrical panel of your home or your business premises.

It is intended to act passively on the electromagnetic environment linked to everyday electrical equipment, while letting all your devices operate normally.

USE

What is the Wavy Plate for?

The electrical panel is the central distribution point for electricity in a home.

The Wavy Plate was developed for people who wish to fit this area with a device intended to act on the electromagnetic environment, without modifying their electrical installation.

Its operation is based on a principle of compensation.

It does not seek to cut off or block the waves and therefore does not disrupt the operation of Wi-Fi, telephones, connected devices or electrical equipment.

BENEFITS

The advantages of the Wavy Plate

- ✓ 100 % standalone operation
- ✓ No power supply
- ✓ No maintenance
- ✓ Does not disrupt the operation of devices
- ✓ Slim and discreet
- ✓ Fits directly on the electrical panel
- ✓ No cells or batteries
- ✓ Does not cut off Wi-Fi
- ✓ Quick installation
- ✓ Made in France
